DETAILED ACTION

Response to the Amendment

The applicants have provided an abstract hence the objection to the specification has been withdrawn.

A new title has also been submitted.

The rejection of claims 18 and 22 under 35 USC 112 first para has been withdrawn since applicants have amended the claims to delete the "preventing" term.

The provisional double patenting rejection over 10/042203 has also been withdrawn since applicants have explained the difference, that applicants current application requires that at least one of X1 to X7 is a OH or OC(O)C1-C4 alkyl.

Applicant's arguments with respect to claims above do overcome the rejections, however have been considered moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 18 and 22 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims treat osteoporosis, , inflammation but there is no description in the specifications regarding this part of the invention.

Art Unit: 1625

The specifications only describe the various cancers as an hyper-proliferative disorder, but yet is excluding cancer.

In re Wands , 858 F. 2d 731,737,8 USPQ2d 1400, 1404 (Fed. Cir. 1988). Ex Parte Forman, 230 USPQ 546 (Bd of App. 1986).

There is no description in the specifications to treat the various disease states other than the different types of cancers.

There is very little predictability in the art that that a specific drug would be able to treat cancer and also osteoporosis and inflammation!

Drugs work in a lock and key mechanism and there is no umbrella efficacy that it would treat all these various diseases.

Conclusion

The claims are not found to be allowable.
